

Rainbow Walk

Junior River Ranger Activity

Can you make a rainbow out of things found at the river?

What you will need

- A bag, box or basket to collect all the objects you find
- A spectrum of colours (like the one below) so you know which colours to collect and what order they come in

1

Go for a walk along your local river to find natural objects to match each colour in the rainbow.

2

Once you have found a good range of objects to represent the rainbow, find a good platform or space to display them.

3

Arrange your finds in a rainbow shape and take a photo to share.

Note: If you are having difficulty finding lots of different colours, you could try collecting as many shades of **green** instead!
