

**Learning Objective: To create a comic strip to show what can happen to rain when it falls**

A comic strip is a series of images that tell a story using pictures, captions and speech bubbles. Use the boxes below (or create your own) to draw a comic strip of 'The Adventures of a Raindrop'.

Use what you have learned about what happens to rainwater in a green landscape (how plants and animals use it) and an urban landscape (built up area). You decide on the adventure your raindrop will have. Start with it falling from a cloud. What happens next?

The Adventures of a Raindrop

The comic strip template consists of five panels arranged in three rows. The top row has two panels. The middle row has a large panel on the right and a smaller panel on the left. The bottom row has two panels.
