

JOB DESCRIPTION

Project Officer

(River & Catchment Restoration)

- REPORTS TO:** Head of Restoring Rivers & Catchments or Senior Project Officer
- RESPONSIBLE FOR:** The development and delivery of physical enhancement and restoration projects in rivers and their environment. This would be achieved through working with teams across the wider organisation including Senior Project Officers, Assistant Project Officers, Education and Engagement teams, landowners, project partners, contractors and volunteers (as appropriate).
- LOCATION:** Hybrid work - at home, in the office in Leatherhead (KT22), and on-site with travel across the SERT area.
-

About us

The South East Rivers Trust (SERT) is an environmental charity dedicated to achieving healthy river ecosystems for all across the South East of England. The Trust's mission is to deliver outstanding river ecosystem enhancement through science-based action, collaboration, education and engagement.

SERT is a member of the Rivers Trust movement which comprises over 60 local trusts. 0% of rivers in England and Wales are in good overall health – the Rivers Trust aims to change this by using our expertise, data, reach, and knowledge to make our shared vision a reality – healthy rivers valued by all. Do you share this vision too?

At SERT, our work includes practical environmental enhancement work, as well as education, engagement and working with different partners to achieve. Our core values are central to all we strive to achieve - bringing positive energy, expertise and specialist knowledge to develop good relationships and to deliver to a high standard to make a real difference to rivers and their catchment areas.

The role

Working in the Enhancing Rivers & Catchments Team, you will develop and deliver a portfolio of physical enhancement projects on the ground. The Project Officer role is an exciting opportunity for an experienced and knowledgeable individual to build on their existing skills to oversee all stages of river and catchment enhancement projects, from conception to development, design and physical implementation.

River enhancement projects will typically include weir removals, fish passage easements (such as rock ramps, nature-like bypasses or technical fish passes) and river re-naturalisation projects (such as habitat enhancements, reconnecting floodplains & palaeochannels, re-meandering, and backwater creation). Catchment management projects are likely to include wetland creation, Sustainable Drainage Systems (SuDS) and Natural Flood Management (NFM) measures. We would be interested to know about any experience you have in the above fields when you apply.

Using your freshwater expertise and proven ability, you will proactively lead on medium and smaller scale projects while working closely with other staff, external partners and stakeholders. You will work with the rest of the team, drawing on the experience of more seasoned staff to help your personal career progression and likewise overseeing Assistant Project Officer and imparting your knowledge onto them. Most importantly of all, you will support the whole team, your line manager and the wider organisation as much as you can.

Initially offered as a two-year fixed term contract, it is expected that the position will be extended, subject to satisfactory performance and continued funding. This is an exciting opportunity to join and support a growing and dynamic team making a real difference for the environment.

KEY DUTIES AND RESPONSIBILITIES

1. Developing and Designing Restoration and Enhancement Projects

- 1.1. Facilitate the development and design of a programme of projects, using sound science and best practice.
- 1.2. Lead on both internal and external input of specialist/technical advice as required for project design (e.g. flood modelling, fish passage options and technical design).
- 1.3. Secure all necessary permissions as required, such as environmental consents (e.g. FRAPs), Planning Permission, landowner agreements etc.
- 1.4. Develop and maintain positive and professional relationships with partners and stakeholders, working with them to develop projects.
- 1.5. Contribute to funding and project management processes as required.
- 1.6. Collaborate with other staff in the design of monitoring programmes to evidence project outcomes.

2. Delivering Restoration and Enhancement Projects

- 2.1. Lead on the delivery of enhancement projects, managing colleagues, contractors, volunteers and partners to deliver, as appropriate.
- 2.2. Be responsible for engaging and managing contractors where appropriate.
- 2.3. Be responsible for Health and Safety compliance, promoting a collaborative approach to ensure successful project outcomes.
- 2.4. Where appropriate, support external partner organisations to deliver their own enhancement projects as part of wider restoration plans.

3. Contribute to the work of the South East Rivers Trust and its trading subsidiary

- 3.1. Contribute to the Trust's external communications (e.g. through websites, social media and presentations), profile and good reputation.

- 3.2. Support the fundraising and growth processes of the Trust and the rivers trust movement.
 - 3.3. Mentor Assistant Project Officers where applicable.
 - 3.4. Other duties as may be appropriate to the position.
-
